

INFORTE SAP BUSINESS INTELLIGENCE

Leveraging SAP Business Intelligence (BI) solutions, Inforte, a Business & Decision Company, helps companies gain meaningful, relevant and shared understanding from their data. With timely and accurate information, tailored to the unique and dynamic requirements of end-users across the organization, our clients can maximize their SAP ROI and use this data-driven insight to guide both strategic and day-to-day execution.

LEADING EDGE SAP BI EXPERTISE

Led by recognized SAP BI experts, Inforte's SAP BI practice focuses exclusively on architecting, designing, developing and deploying SAP BI and supporting SAP NetWeaver technologies that enable organizations to capitalize on its unique value. With SAP BI experience dating back to its release and testing pre-release in Walldorf, Inforte excels in **thought leadership** and wrote the widely acclaimed, definitive book, "Mastering the SAP Business Information Warehouse." Our enduring commitment to thought leadership is prevalent throughout our entire team and reflected in the longstanding relationships we have with SAP BI product management and consulting. Additionally, we often participate in collaborative initiatives directly with SAP development, and are frequent presenters at SAP events.

Inforte brings a **broad, comprehensive architectural perspective and depth of product understanding** that is difficult to find in today's marketplace. This unique perspective can significantly increase the potential of success of your business intelligence environment. A preferred services partner of SAP, Inforte brings significant depth of product understanding to help clients **achieve measurable results** across the full breadth of BI services:

- BI Competency Center (BICC) Design & Strategy
- Assessments and Proofs of Concept
- BI Data Warehousing & Reporting
- Business Objects Front-end Reporting
- Planning, Forecasting, and Budgeting using BI-Integrated Planning and/or OutlookSoft
- BPS to BI-IP/OutlookSoft Upgrades
- BW 3.X to 7.0 Technical & Functional Upgrades
- BW Performance Optimization

A PROVEN TRACK RECORD

As SAP solution offerings continue to evolve, consideration of complex architectural implications on BI environments is of paramount importance. With a reputation for superior execution and follow through, Inforte works with clients to:

ABOUT INFORTE

Inforte, a Business & Decision Company, helps its clients achieve business value from their technology investments with a unique combination of Strategy, Business Intelligence and CRM consulting services. - Implement business intelligence solutions on-time and within budget
- Develop and improve management systems with flexible SAP BI analysis tools
- Optimize operations by providing continuous visibility into and adjustment of actual versus forecasted performance
- Achieve strategic capitalization on new SAP technology and solutions

BUSINESS OBJECTS INTEGRATION

Inforte, a Business Objects solution provider partner, is a global thought leader in the integration of SAP and Business Objects (BO). Our consultants work closely with BO/SAP product managers and technology experts to create actionable strategies for implementing hybrid BO/SAP solutions. We understand the integration and architectural considerations that maximize the value of hybrid BI architectures, making Inforte the **leading expert in assessing and implementing Business Objects for SAP BI customers**.

As a Business Objects partner, Inforte has demonstrated expertise with Business Objects technologies and a proven ability to meet customer needs. Solution provider partners receive a large collection of benefits, including access to training and support, that help to ensure they can meet the complex business intelligence requirements of their customers.

COMMITTED TO RESULTS

We consider each of our implementations and solutions unique and tailor both our talent and our approach to work optimally within your environment. With a deep understanding of industry specific challenges, we help our clients best **utilize critical information** from SAP and non-SAP environments and distinguish ourselves with our **superior technical expertise** and single-minded commitment to the success of our clients.
