

Leveraging Oracle Enterprise Performance Management (EPM) solutions, Business & Decision (B&D) helps organizations maximize their investments in Hyperion software and Oracle Business Intelligence (OBIEE). Through the use of our best practice knowledge, design, and implementation experience, B&D's Hyperion/OBIEE consulting practice helps its customers achieve greater visibility into their strategic and day-to-day performance. A **premier partner with Hyperion since 1994**, B&D's Business Intelligence practice excels in delivering outstanding enterprise performance management solutions to its customers.

### LEADING EDGE HYPERION/ORACLE BI EXPERTISE

With more than 300 successful Hyperion/OBIEE implementations worldwide, B&D offers the lowest risk and highest value to those organizations considering an implementation or rollout of Hyperion/OBIEE. Our repeatable and successful methodology **delivers high quality implementations on-time and within budget**. Our expertise and history with these solutions wins us frequent invitations to collaborate directly with Hyperion and Oracle developers, and we often present at Hyperion/Oracle conferences on cutting edge functionality and innovative risk mitigation strategies.

Our Business Intelligence practice offers many services that go beyond BI technology consulting, including strategy and business consulting, performance management services, pilots, assessments and value discovery, change management, offshore delivery and support, and hosting services for Hyperion/OBIEE.

Service offerings:

- BI Competency Center (BICC) Design & Strategy
- Assessments and Proofs of Concept
- Hyperion Reporting, Essbase, Planning, Enterprise implementations
- Upgrades to Hyperion System 9
- Workforce Planning and Capital Expense Planning
- Hyperion Financial Management (HFM)
- Hosted HFM
- Oracle BI Enterprise Edition Plus (OBIEE+)
- Financial Data Quality Management (FDQM)
- Hyperion Application Link (HAL)
- Business Performance Mgt Application (BPMA)

### A PROVEN TRACK RECORD

As the integrated Oracle and Hyperion solution offering continues to evolve, consideration of complex architectural implications on BI environments is of paramount importance. With a reputation for superior execution and follow through, B&D works with clients to:

- Implement business intelligence solutions on-time and within budget
- Develop and improve performance management systems with Hyperion/Oracle solutions
- Optimize operations by providing continuous visibility into and adjustment of actual versus forecasted performance
- Achieve strategic capitalization on new Hyperion/Oracle technology and solutions

### HYPERION/ORACLE INTEGRATION

Business & Decision, partner to both Hyperion and Oracle, is a **global thought leader** in the integration of their products. Our consultants work closely with Oracle and Hyperion product managers and technology experts to create actionable strategies for implementing BI/EPM solutions. B&D is also one of the first Hyperion partners to have implemented OBIEE and its predecessor, Siebel Analytics, thus lowering our customer's risk of implementing a Hyperion solution integrated with OBIEE.

As a Hyperion Platinum partner, Business & Decision has demonstrated expertise with Hyperion technologies and a proven ability to meet customer needs. We understand the integration and architectural considerations that maximize the value of Oracle BI and Hyperion, making Business & Decision the **leading expert in assessing and implementing Hyperion and Oracle BI**.

### HOW BUSINESS & DECISION CAN HELP
