Neutrix Cloud™

Sovereign Storage Enabling Real-Time Competition Between Public Clouds

Enhance workload agility, easily move workloads without moving data.

High performance, high availability for production and test/dev.

Eliminate hidden cloud costs for storage.

Neutrix Cloud

FLEXIBILITY

Multi-cloud, multi-availability zone, multi-protocol Neutrix Cloud makes it easier than ever to centralize your data and provide simultaneous access to multiple public cloud services. Run enterprise applications natively in your virtual private cloud while utilizing adjacent enterprise class storage. InfiniBox owners can easily implement Disaster Recovery as a Service (DRaaS) with Neutrix Cloud as the target for replication.

ECONOMICS

Neutrix Cloud makes it easier to reduce the costs of cloud computing by avoiding costly data transfer fees, as well as employing highly efficient snapshots to support test/dev instances at petabyte scale.Commoditize cloud compute by leveraging spot pricing for app instances across clouds without moving your data. At 9¢/GB/month, Neutrix Cloud is a sound economic choice.

ENTERPRISE CLASS FEATURES

Choose from file or block storage, with options for read only and writable snapshots, to accelerate your cloud-scale application development and deployments. Enjoy all the features and benefits of enterprise storage, including high availability and enterprise proven reliability.
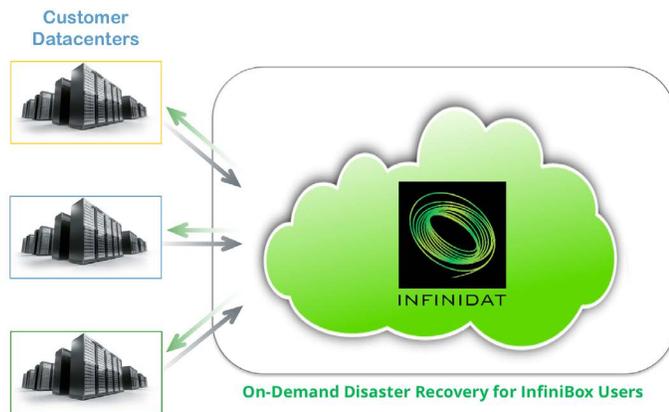

DATA PROTECTION

Using the Infinidat technology foundation, including InfiniRAID, your data is proactively secured and constantly checked for integrity to insure the highest levels of data reliability.
